

U18 & U18i

Omega Corps

Description; High Power Single 18" enclosure specified for use in both small rental and large concert applications. Single 18" design can be stacked and handled easily and does not sacrifice performance when comparing 2 U18 to a standard dual 18" model. The U18 Travels with 3(4-max)-enclosures stacked vertically on a cart and is designed for a ¼ pack configuration in truck for 4 wide stacking. Features Omega loop thru plate facilitating the user to run up to 8 units from a single NL4 connector (4 to 6 nominal (8 max)). Installation (i) models do not contain handles recess feet or pole cup. Can be utilized as a Cardioid Sub when ran in the specified program and configuration.

Specifications
